

BOSTON SPA PARISH COUNCIL

Don't miss out!

As we hear more and more about climate change, local businesses are playing their part in making change happen. Want to know how you can help achieve the following?

- **Reduce your business waste collection costs**
- **Free local event advertising**
- **Participation to drive recognition of your support & additional custom**
- **Divert your food waste to a local composter rather than contaminating your general waste**
- **Improve recycling of your waste cans, plastic bottles and glass**
- **Reduce the amount of general waste going to landfill or incineration**
- **Reduce the amount of single use plastic you use and avoid the single use levy next year.**

Together, let's make the next 12 months the moment to take action to create a cleaner local environment for us all.

Join us at our Q&A sessions, with your ideas and support to make our local environment cleaner, tidier and better for us all and future generations. Scan this QR code with your phone to find out the date of the next meeting;
